TITLE	A Directory of Counselor Education Courses Covering Career, Occupational and Labor Market Information Concepts.
INSTITUTION	Ohio State Univ., Columbus. National Center for Research in Vocational Education.
SPONS AGENCY	National Occupational Information Coordinating Committee (DOL/ETA), Washington, DC.
PUB DATE	Jan 88
NOTE	479p.
PUB TYPE	Reference Materials - Directories/Catalogs (132)
EDRS PRICE	MF01/PC20 Plus Postage.
DESCRIPTORS	*Career Counseling; *College Programs; Continuing Education; Counseling Techniques; *Counselor Training; *Course Content; Course Descriptions; Higher Education; *Information Utilization; Labor Market; *Occupational Information

ABSTRACT

This directory is intended to describe the nature and structure of the university and college courses that typically train counselors to use labor market and career information with their clients. The course descriptions included in the directory were identified during a national study during which 424 institutions reported offering a total of 648 courses devoted to training counselors in how to use the various sources of career and labor market information available. The course descriptions are arranged by state. Each course description contains the following information: state; institution name and address; department chairperson; course title, type, and level; primary focus; client target groups; approximate number of persons in attendance during an average year; and name and address of instructor. The guide includes descriptions of 93 seminars, 63 special classes, 538 ongoing classes, and 12 off-campus courses. Of these, 80 are on the undergraduate level, 334 are graduate-level courses, and 14 offer continuing education units. The courses' target client groups include vocational rehabilitation, elementary/secondary counselors, military recruiters/education specialists, postsecondary counselors, employment training agencies, and employment services. A DIRECTORY OF COUNSELOR EDUCATION COURSES COVERING CAREER, OCCUPATIONAL AND LABOR MARKET INFORMATION CONCEPTS

Prepared by

The National Center for Research in Vocational Education
The Ohio State University

Under a Grant With the National Occupational Information
Coordinating Committee

January, 1988

FOREWORD

Counselors play a crucial role in assisting individuals in the effective use of career, occupational, and labor market information to make informed career decisions. Over the past several years, the Department of Defense and the National Occupational Information Coordinating Committee (NOICC) have been involved in a major effort, the Improve Career Decision Making (ICDM) Project, designed to help counselors to use labor market and career information more effectively with counselees.

The original ICDM effort focused on providing training to practicing counselors. While there will be a continuing need to keep counselors informed about new techniques and resources, it is clear that there also is a need for similar instruction to be provided to prospective counselors in university and college counselor education programs. Recognizing this need, a basic text has been developed and published entitled Using Labor Market Information in Career Exploration and Decision Making: A Resource Guide to serve in training both counselors already on the job and perspective counselors in counselor education programs.

This directory has been prepared to describe the nature and structure of university and college courses that typically cover the aforementioned concept.

We are grateful to Mr. Harry N. Drier, Ms. Judith M. Boylson and Ms. Beverly K. Haynes of the National Center for Research in Vocational Education for gathering information and for preparing the update of this directory. We also are indebted to the following members of the NOICC staff who contributed to this project: Ms. Joyce Kinnison, Ms. Valerie Lloyd and Mr. Walton Webb.

Juliette Noone Lester
Executive Director
National Occupational Information
Coordinating Committee

INTRODUCTION

Process of Selecting Programs and Courses

The identification, selection, and description of inservice and preservice training opportunities available in counselor preparation programs nationwide is a complex process. Each institution organizes, labels, and delivers programs and courses in different ways to meet the unique needs of their departments. In order to assemble the most complete directory of courses, the following process was used.

The project staff reviewed Counselor Preparation - 1986-89: Programs, Personnel, Trends, Sixth Edition by Joseph Hollis and Richard A. Wantz. This directory provides information concerning accredited programs, certification, licensure, experiential components of various departments, professional organizations, and information concerning the unique organizational aspects of state boards of vocational education and departments of public instruction. From this document, over 450 colleges and universities were identified as those that might currently operate a counselor education department. The department chairperson in each university was sent a descriptive letter and a course confirmation and/or a nomination application. Each department chairperson was to confirm or update the demographic information on file and to nominate by name those staff members who were teaching courses that relate to career development and occupational information course criteria. Each course instructor was then sent a letter and an information form to use to describe their course(s).
[NOTE: The letters requesting the information were sent to those who had been listed in the 1983 directory as well as to those who were not listed in the previous edition as well as appropriate state organizations and agencies.]

Because we were attempting to develop a directory and not a document that would attempt a comprehensive description of each course, questions in the following categories were asked:

1. Course title, type and level--to ascertain if the course was a seminar, an ongoing course for credit, off-campus option, etc.

2. Primary focus--to determine the nature of each course, e.g., labor market, information computerized techniques, educational and occupational information, career planning, etc.

3. Client target groups--to determine who typically took the courses, e.g., public school counselors, vocational rehabilitation counselors, as well as the normal number of persons enrolling by category for the course. The information collected for each of these categories was organized using a common format for efficient use.

Several follow-ups were conducted to nonresponding institutions. As before, we do not know if a nonresponse was an indication that the department no longer existed or if no related course was available within the department.

A Brief Comparison of the 1983 and 1988 Editions

We have been able to extract selected data comparing certain categories of information from the 1983 and 1988 surveys. The following is a brief summary of this comparison.

Course Type	Number of Course Listings	
	1983	1988
1. Seminar	82	93
2. Special Class	45	63
3. Ongoing	469	538
4. Off-campus	10	12
Course Level		
1. Undergraduate	104	80
2. Graduate (Offering pre- and in-service)		334
Preservice	474	248
Inservice	70	51
3. Continuing Education Units	21	14
Primary Focus		
1. Labor Market Information	345	403
2. Educational Information	384	434
3. Occupational Information	445	509
4. Career Planning	485	526
5. Computerized Guidance Techniques	260	309
6. Noncomputerized Guidance Techniques	299	342
7. Career Decision Making	466	525
8. Military Occupational Information	41	59
Client Target Group		
1. Vocational Rehabilitation	151	194
2. Elementary/Secondary Counselors	434	489
3. Military Recruiters/Education Specialists	10	19
4. Postsecondary Counselors	337	394
5. Employment Training Agencies	20	46
6. Employment Service	138	155

Number of Students Enrolled

There are a total of 648 courses cited as compared to 609 in 1983. In these courses there were 26,546 students enrolled. The average number of students enrolled is 40.96 with a range of 2 to 650. (The Appalachian State University reported a course with an enrollment of 650 students in an average year. This is almost twice as many as the next highest number of students enrolled. Because this number is so much larger than any other it is important to report an average not including this number. So in 647 courses with 25,896 students enrolled, we find an average of 40.02 students per course.)

	1983	1988
Total Number of Institutions Reporting	323	424
Total Number of Courses Cited	609	648

Use of the Directory

Even though this directory in no way presents all available courses dealing with career and labor market information, it does provide a number of perspectives and data sources for consideration. The following are some suggested ways of examining and using the directory.

1. The reader can see how, and at what level, professional development courses are provided. Analysis could focus on the range of opportunities provided at the inservice, preservice, undergraduate, and graduate levels, and on what percentage of courses are a part of an ongoing program versus those that are special offerings provided on a less than formal basis. This analysis could suggest to providers of training materials the types and levels of new materials that might be needed.

2. The reader could analyze the major focus of presented course offerings. Such analysis could suggest the percentage of courses that deal mainly with theory, research, broad issues such as career developments or specific topics such as technology, methods, or use of career and labor market information. This perspective could aid those concerned about the balance of offerings across the nation or in a state and the need for new programs/courses and related material development.

3. As the profile of consumers accessing career guidance courses might be changing, this directory could aid state and national groups in identifying decreasing enrollments for certain groups and/or increasing participation of others. No doubt as the profile of students changes, so does the environment where skills are applied. This information will aid policy makers and providers of training materials insights on how curriculum should be upgraded and the type of program/course marketing that should take place.

4. Current data do not suggest how many persons nationally are involved in professional improvement in the areas of career guidance, information, and related methodologies. This directory provides a limited data baseline for present analysis and future comparison.

5. Professional associations, state agency personnel, federal agency personnel, private sector groups, commercial publishers, and many other groups would like to personalize their ongoing communication to the persons mainly responsible for teaching specific content at specific levels of instruction. This directory registers instructors who currently are providing the bulk of our nation's training. With this tool, those who want to communicate with these individuals now know who the key personnel are.

Lastly, be assured that this directory in no way compares or makes value judgments about the information provided. Instead, it is but a profile of each course(s) within a context of a specific college or university and state which will provide a means by which new and useful information, training opportunities, and products can be provided by the Department of Labor, the National Occupational Information Coordinating Committee (NOICC), and state information developers.

Please respond to these brief questions:

1. Are you familiar with the National Occupational Information Coordinating Committee (NOICC) and its purpose? Yes ___ No ___ Send more information ___

2. Have you ever attended a counselor educator training session conducted by the American Association for Counseling and Development titled "Using Labor Market Information in Career Exploration and Decision Making"? Yes ___ No ___ Send more information ___

3. Does your state have guidelines or standards for comprehensive career guidance programs? Yes ___ No ___ Don't know ___

4. If yes (to #4), does the content and instruction of your program familiarize trainees with these requirements? Yes ___ No ___ Don't know ___

* * *

5. Are you familiar with your State Occupational Information Coordinating Committee (SOICC) and its purpose? Yes ___ No ___ Send more information ___

6. Have you ever contacted or received information from your SOICC? Yes ___ No ___

7. Have you ever attended a counselor training session sponsored by your SOICC, sometimes titled "Improved Career Decision Making (ICDM)"? Yes ___ No ___ Send more information ___

8. Are you familiar with your state's computerized career information delivery system (CIDS) and its purpose? Yes ___ No ___ Send more information ___

9. Do you include information on your state's CIDS in apropriate instruction/coursework with your students (counselors-in-training)? Yes ___ No ___ Send more information ___

10. Would you be interested in receiving information concerning national guidelines for guidance program standards or training materials for counselor training? No ___ Send information ___

11. Would you be interested in receiving a copy of this directory if available? Yes ___ No ___

Thank you for your assistance. Please send this form and any sample materials you would like shared to:
